

How heavy?

You will need some kitchen scales that can weigh things in kilograms.

- ◆ Ask your child to find something that weighs close to 1 kilogram.
- ◆ Can he / she find something that weighs exactly 1 kilogram?
- ◆ Find some things that weigh about half a kilogram.

Out and about

- ◆ During a week, look outside for 'thirties' numbers, such as 34 or 38, on house doors, number plates, bus stops, etc. How many can you spot? What is the biggest one you can find?

31 39 36 35 33

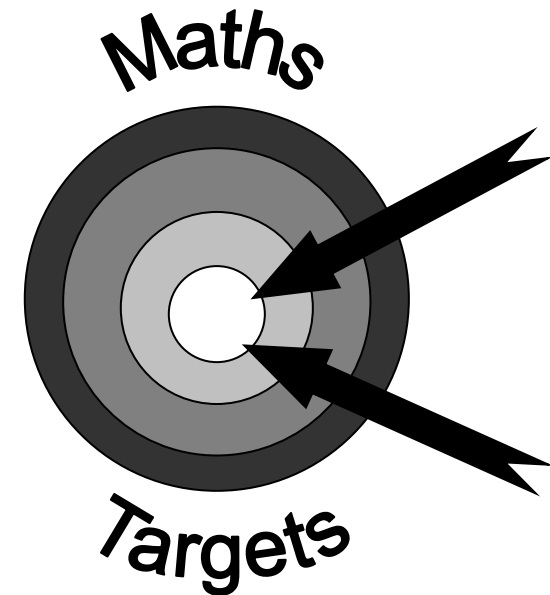

- ◆ Next week, look for 'fifties' numbers, or 'sixties'...

How much?

- ◆ Once a week, tip out the small change from a purse. Count it up with your child.

Targets for pupils in Year 2

A booklet for parents

Help your child with mathematics

Targets – Year 2

By the end of Year 2, most children should be able to...

- Count to at least 100, and read and write two-digit and three-digit numbers in figures and words.
- Given any six numbers up to 100, put them in order.
- Count forwards and backwards in ones, twos, fives or tens from any two-digit number, e.g. *twenty-six, thirty-six,*
- Recognise odd and even numbers.
- Add and subtract mentally a one digit number or multiple of ten to or from a two-digit. e.g. $37 + 8$
- Recall all addition and subtractions facts to 20, e.g. $4 + 10 = 20$, $12 - 8 = 4$.
- Know pairs of 'tens' numbers that make 100, e.g. $30 + 70$.
- Double all numbers to 20 and know the corresponding halves.
- Know by heart the 2, 5 and 10 times tables and related division facts.
- Use the symbols $+$, $-$, \times , \div , and $=$ to record and interpret number sentences.
- Find the total value of a handful of coins to £1.
- Measure or weigh using metres, centimetres, kilograms or litres.
- Use a ruler to draw and measure lines to the nearest centimetre.
- Tell the time to the half and quarter hour.
- Name and describe common 2-D and 3-D shapes.
- Solve simple number problems, and explain how to work them out.

About the targets

These targets show some of the things your child should be able to do by the end of Year 2.

A target may be harder than it seems, e.g. a child who can count up to 100 may still have trouble saying which number comes after 47 or which number comes before 50.

Fun activities to do at home

Number facts

You need a 1–6 dice.

- ◆ Take turns. Roll the dice. See how quickly you can say the number to add to the number on the dice to make 10, e.g.

and

6

- ◆ If you are right, you score a point.
- ◆ The first to get 10 points wins.

You can extend this activity by making the two numbers add up to 20, or 50.
